Module A agenda: Digitisation – Terms and history

- 1. The difference between Digitisation, Digitalization and Digital Transformation**
 - 1.1 Task – Multiple choices
- 2. The history of Digitisation - Video**
 - 2.1 Task – Video and multiple choices

1. The difference between Digitisation, Digitalization and Digital Transformation

Considering the impact they have and the implementation chronology we have:

Digitisation

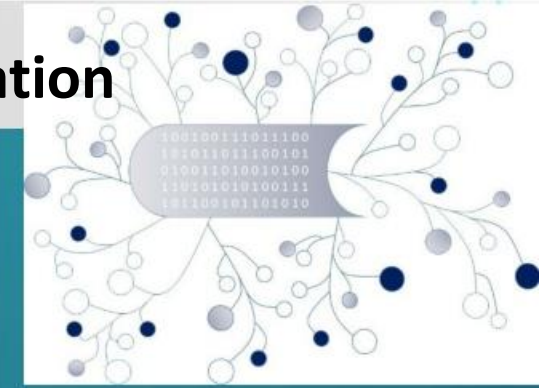

Digitalization

Digital Transformation.

1. The difference between Digitisation, Digitalization and Digital Transformation

What means Digitization?

Digitization is the transition (conversion) from traditional forms of storage (magnetic tape records, paper documents, etc.) to binary code. Namely, the transition from analog to digital representation of things.

1. The difference between Digitisation, Digitalization and Digital Transformation

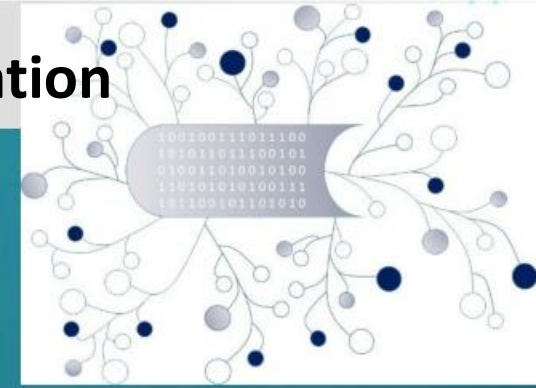

What means Digitalization?

Digitalization it is defined from three distinct perspectives:

In business, digitalization means the activation, improvement, transformation of business operations or functions, models, processes or activities, through the use of digital technologies and data, actionable towards a predetermined goal.

The second perspective is the digitalization of an environment, areas or flow. The digital job involves: digital things; digital tools; social collaboration platforms; unified communication platforms

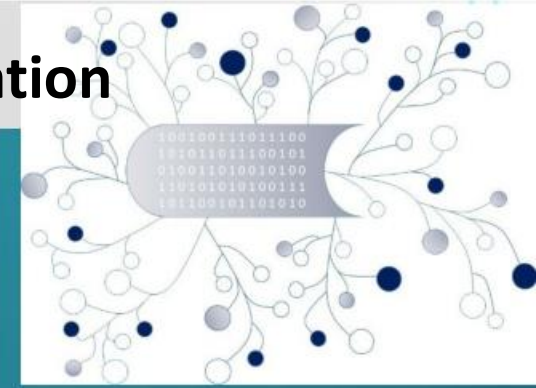

The third perspective of digitalization refers to the continuous adoption of digital technologies in all social and human activities: digital healthcare, predictive or preventive medicine; digital governance and marketing; digital advertising.

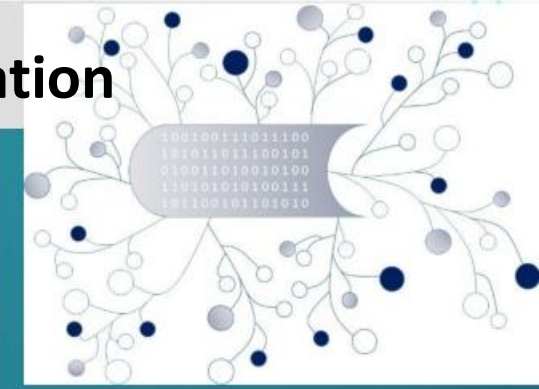

1. The difference between Digitisation, Digitalization and Digital Transformation

What means Digital Transformation?

It is the profound and accelerated transformation of activities, processes, skills and business models, in line with the opportunities of digital technologies and their impact on cognitive-emotional activity, behavior and actions of individuals, leading to a new economy and society.

1. The difference between Digitisation, Digitalization and Digital Transformation

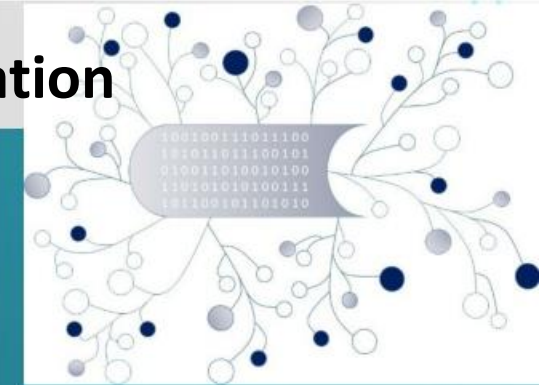

Digitization:
Only the transformation
from analog to digital.

Digitalization
Make digital information
work for you.

Digital transformation
Using the benefits of digitalization
to create new business.

Conclusion

1. The difference between Digitisation, Digitalization and Digital Transformation

Looking the video <https://www.youtube.com/watch?v=iOdG4Atc2sY>, pick the correct answers.

- in the future people will no longer have jobs, they will be replaced by robots
- in 2011 the number of readers who informed themselves online exceeded that of those who read the newspapers in order to be informed.
- as a result of digitization, the information storage capacity has grown 4 times faster than the world economy
- nowadays, at any moment over 23 million are connected online who talk to each other.
