

Centre for Education, ICT Training and Research

Private Organisation – Educational Centre
Accredited by the Cyprus Ministry of
Education and Culture

European Research Centre

Our contribution to achieving the targets set in ET 2020 Strategy has introduced us to the world of collaboration, building of knowledge and skills alliances, mobility of policies and good practices that will enrich the quality and competitiveness of the services provided

Main Programmes

Erasmus+ KA1 - Learning Mobility of Individuals:
(Educators, Youth Workers and Young People)

Erasmus+ KA2 – Innovation and Exchange of Good Practice.

Erasmus+ KA3 – Support for policy reform

Sectors:

- School Sector
- VET Sector
- Youth Sector
- Adult Sector
- Higher Education
- Sports
- AMIF

Network of Associations

1. ICELAND
2. FINLAND
3. FRANCE
4. GERMANY

Digi-VET - Introduction

(Translation pending)

Dear readers,

We are very pleased that you have chosen the Digi-VET learning platform. Here you will find great learning modules, but also corresponding teacher training courses that will help you to develop and develop the topic of digitization and Industry 4.0 for vocational training.

The special thing about this learning platform is that you will find the training modules in German, English, Romanian and Greek as well as country-specific content on the module topics under the individual country flags. In total, you get 48 learner modules and 64 teacher modules.

In addition to supplementary materials such as the Digi-VET competence profile, which aims at the skills and competencies of the modules, the European consortium has also developed additional classroom materials in the relevant national languages and made them available for you to download below the relevant training modules.

We look forward to welcoming you here and wish you a successful learning time on the Digi-VET learning platform!

Your Digi-VET project team

The Digi-VET Platform, which hosts all materials

Digi-VET - Fostering Digitization and Industry 4.0 in vocational education and training

Project Number: 2018-1-DE02-KA202-005145

The image shows the cover of a publication titled "DIGI-VET" with the subtitle "FOSTERING DIGITISATION AND INDUSTRY 4.0 IN VOCATIONAL EDUCATION AND TRAINING". It is identified as "IO4 Teacher Module 1 – The Digi VET Project and the Digi VET Curriculum". The cover features a blue background with white circuit-like patterns and a central graphic of a network of nodes and lines. A small inset image in the top right corner shows a similar network graphic. At the bottom, there is a disclaimer from the European Commission and a logo for the Erasmus+ programme.

Current Status and future developments in Cyprus

1. Introduction
2. Status of Digitisation in Cyprus
3. Digital Transformation/Future Developments
4. Conclusion

1. Introduction

During 2013, Cyprus was affected by the Eurozone financial and banking crisis. However, after implementing the reform programme, Cyprus exited the EU/IMF bail-out programme in March 2016.

The video below explains a bit further.

<https://www.youtube.com/watch?v=v1NApExY6Rs>

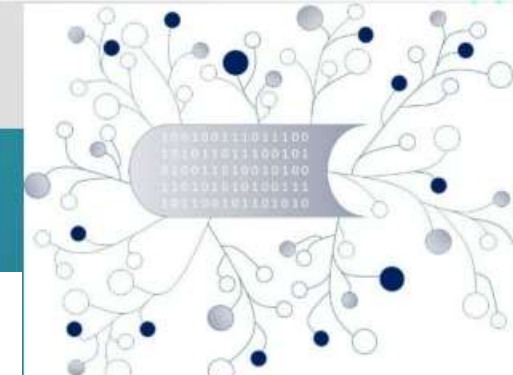

Cyprus is a moderate innovator characterised by a medium-low level of Digitisation. This can be partly attributed to structural differences from most EU economies, particularly regarding the low contribution in terms of value added, of high and medium tech **manufacturing**, foreign controlled enterprises and large firms.

2. Status of Digitisation

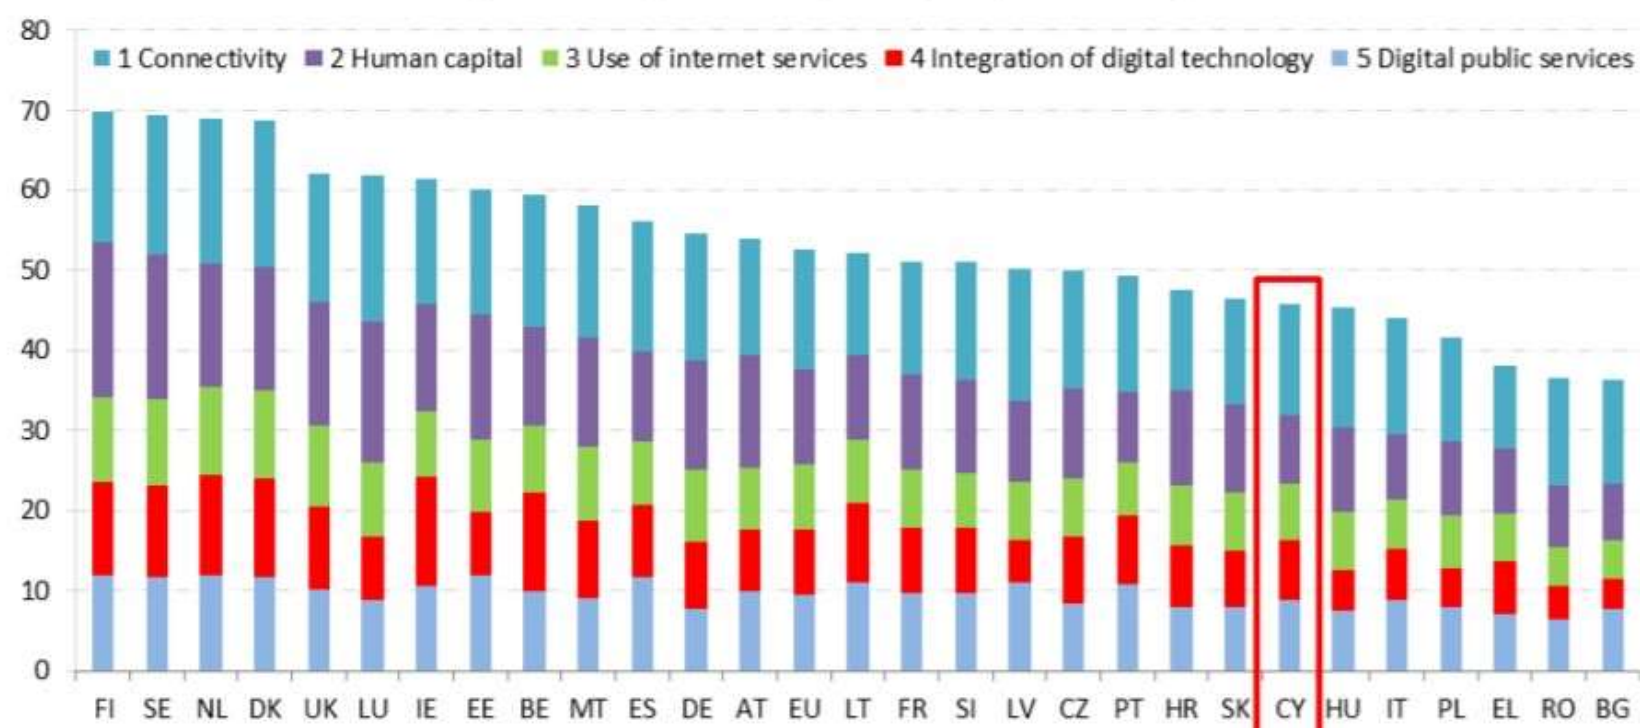

According to the European Commission's Digital Economy and Society Index (DESI) 2019 Country Report, Cyprus ranks 22nd out of the 28 EU Member States.

In comparison to the previous reports in 2017 & 2018 Cyprus has improved in the areas of Connectivity, Use of internet services, Integration of digital technology and Digital public services, although it still scores below the EU average. However, Cyprus performed less well in the Human capital during 2019.

	Cyprus		EU
	rank	score	score
DESI 2019	22	45.8	52.5
DESI 2018	22	43.2	49.8
DESI 2017	22	40.5	46.9

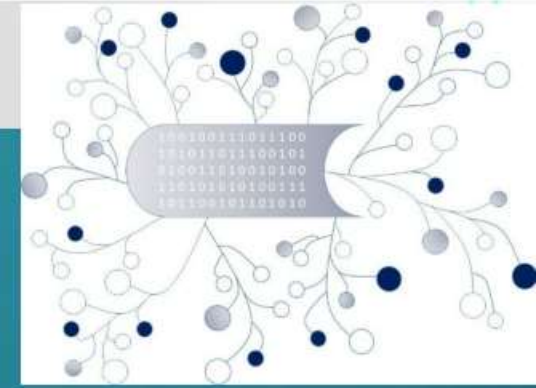

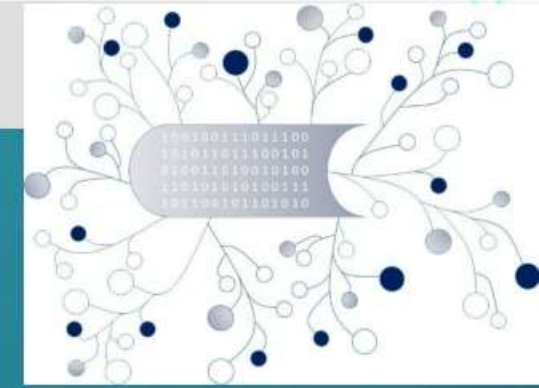

Digital Economy and Society Index (DESI) 2019 ranking

In mobile broadband take-up, Cyprus is above the EU average. However, it is well below the EU average in the take-up of fast broadband. Almost a sixth of Cypriots have never used the Internet, and half lack basic digital skills. Despite growing demand in the labour market, the supply of ICT specialists is still below the EU average.

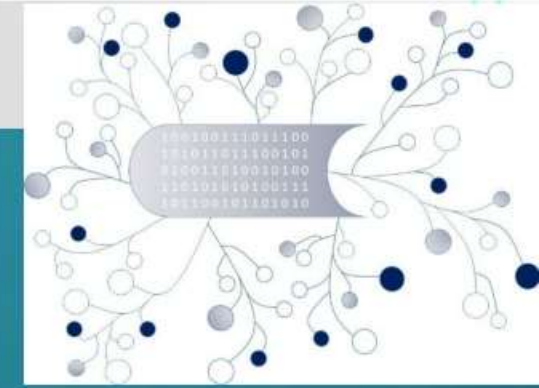

3. Digital Transformation / Future Developments

Innovation related to digital transformation, and particularly e-Government, is particularly important to support the currently slow pace of public sector reform in Cyprus, generating multiple benefits including:

- reduced bureaucracy and enhanced transparency,
- improved quality and efficiency of service to citizens and businesses
- improved citizens' satisfaction and enhanced credibility for the public service,
- reduced operational cost through increasing productivity and saving resources and time

4. Conclusion

Although Cyprus took a big setback during the 2013 economic crisis, it seems that there is a slow but steady development in terms of its mobile broadband, connectivity and contributions towards education.

Its future plans that are to be implemented, include Artificial Intelligence and blockchain technologies as a country that already provides quality financial services.

Thank you for your
attention!
